

Principles for teaching science at Dringhouses Primary School.

At Dringhouses Primary School, we believe that great science occurs when...

- *It is fun and memorable including ‘wow’ moments so that children are inquisitive and want to ask questions.*
- *It is given dedicated teaching time.*
- *Children and staff are excited, enthusiastic and engaged in science through practical, ‘hands on’ work and investigations.*
- *Lessons are thought provoking and inspiring, leading children to wonder, ask questions, research and then discuss their learning at home.*
- *It links to real life and is relevant, and where children can make links across other subjects and build on prior knowledge.*
